In Progress1

Design_project_Data_Platform #50
Refactoring and Optimizing code-base

+ Add item

Done40

Design_project_Data_Platform #6
Extend the Driver Service

Design_project_Data_Platform #10
Change local DB updating to App Service

Design_project_Data_Platform #41
Get Data from a Device

Design_project_Data_Platform #43
Driver system 3.0 with device selection system

Design_project_Data_Platform #47
Page styling

Design_project_Data_Platform #20
Modify UX of main page

Design_project_Data_Platform #22
Modify UX of Admin page

Design_project_Data_Platform #25
Energy usage calculations using fuel consumption

Design_project_Data_Platform #24
Expand Data Acquisition for multiple devices

Design_project_Data_Platform #12
Extend kinetic model

Design_project_Data_Platform #27
Try migrate localhost to http 2

Design_project_Data_Platform #29
Obtain mass air flow data to implement fuel consumption model

Design_project_Data_Platform #30
Use a Web API to determine altitude

Design_project_Data_Platform #31
Link rout data to google maps display

Design_project_Data_Platform #44
Process erroneous and missing data

Design_project_Data_Platform #45
Restructure Data Collection with API

Design_project_Data_Platform #49
Write results to database

Design_project_Data_Platform #7
Build initial Car service

Design_project_Data_Platform #32
Add Device ID's

Design_project_Data_Platform #8
Build Initial Driver Service

Design_project_Data_Platform #9
deploy app to cloud

Design_project_Data_Platform #11
Link to database

Design_project_Data_Platform #13
build initial Auth Service

Design_project_Data_Platform #14
Build initial Data Platform
